

In reference to MB Docket No. 04-233, I would like to voice that we enjoy listening to KLOVE and AIR1 on our local radio stations. These stations serve us by playing encouraging music, and by praying for me in our community. These stations also encourage people to donate to local charities and international charities to help orphans and refugees throughout the world. If KLOVE and/or AIR1 were displaced by LPFM broadcaster providing other programming, I would be disgruntled. This music they play puts me in a good mood on the way to work and calms my nerves after a busy day at work. I've heard many friends say the same thing. The whole community is encouraged by listening to the music they play, and for it to be replaced would be taking that encouragement away from the community. Keeping these stations on the air is in the public interest because it puts people in an environment of positive thinking, and it encourages listeners to forgive, love and hope.
